# South West Agricultural Resource Management Initiative

Help for farmers and growers to manage resources effectively  
in South West England

Rural Development Programme for England business support

# South West Agricultural Resource Management Initiative

Practical help and funding is available to allow you to manage your resources in the best way possible – improving farm profitability and helping the environment.

## Support available

The following two areas of support are available to farmers and growers across the South West providing expert advice and funding to help you manage your resources in the most efficient way.

**Soils for Profit** (nutrients, manure, soils). This programme provides expert advice, workshops, feasibility studies, demonstrations and training.

**Resource Efficiency for Farms** (water, energy and inorganic waste). Support through this programme includes on-farm tailored advice with in-depth technical support, if required.

**Small on-farm capital grants.** Grants, normally up to £10,000, are available to farm businesses to implement the expert recommendations, developed through the two initiatives featured on this flyer.

## Next steps

Contact the South West Rural Enterprise Gateway on **0845 600 9966** or visit **[www.sw-ruralgateway.info](http://www.sw-ruralgateway.info)** for more information and next steps about Soils for Profit or Resource Efficiency for Farms.
